- **High availability of email** through multiple database copies
- And more! Read the Service Offering Definition for more details.

FEATURES

Remain in control - Exchange lets you tailor your solution based on your unique needs and ensures that your communications are always available while you remain in control. Move to the cloud overnight, deploy on-premises, or manage a hybrid deployment with mailboxes that are both online and on-premises.

Do more on any device - Exchange helps you be more productive by helping you manage increasing volumes of communications across multiple devices and work together more effectively as teams. With a group inbox, calendar, and conversation, your teams can self-organize and keep work moving forward.

Protect your organization - Exchange helps protect business communication and sensitive information, simplifying internal and regulatory compliance. Built-in defenses against viruses, spam, and phishing attacks actively protect your communications. Tips in Outlook inform users about policy violations before sensitive data is sent.
