# Invoice Organization, Continued

All invoice sections except the remittance page are presented by default in side-by-side landscape format. Each invoice image is reduced and rotated with two images placed side-by-side on the front and back of the sheet. See the diagrams below for examples of the invoice layout. These particular examples represent invoice summaries for a single account customer.

# Invoice Organization, Continued

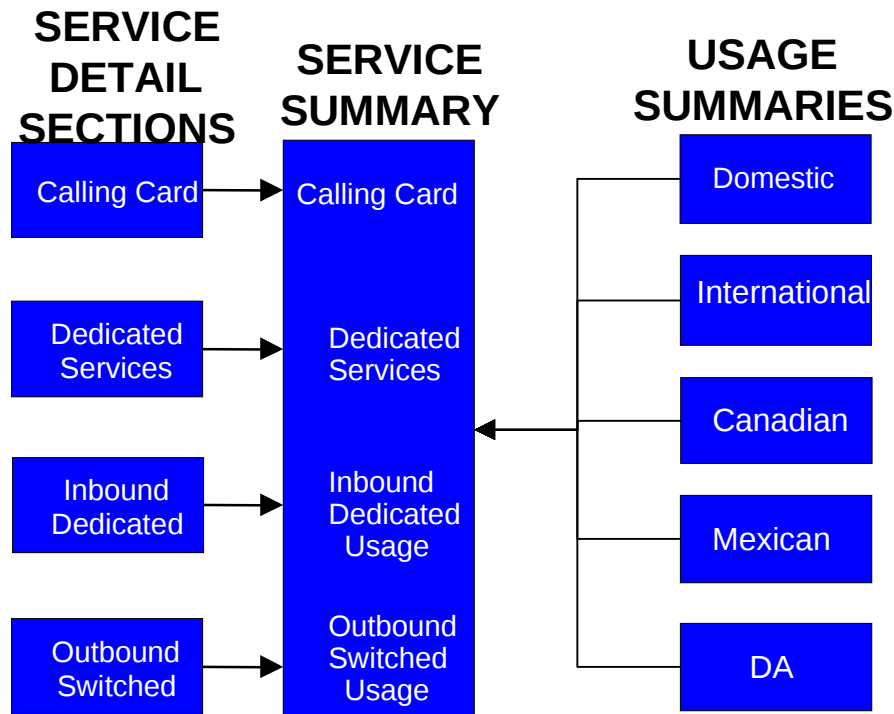

The invoice organizes the customer's charges by service type. Service types include:

- Dedicates Services
- Outbound Dedicated
- Inbound Dedicated
- Equipment and Miscellaneous Charges
- Outbound Switched
- Inbound Switched
- Calling Card
- Ring - To

# Invoice Organization, Continued

The Service Summary and Service Detail invoice sections are organized by service type. Calls / Minutes / Charges in each service detail section roll-up to one line summary in Service Summary section. The Usage Summary reports group Calls / Minutes / Charges by product component (i.e., domestic, international, Canadian, Mexican, Directory Assistance).

See the diagram below for a graphical display of the relationship among the three invoice sections.

# Invoice Organization, Continued

The invoice contains two tables of contents:

**1** The **Invoice contents** section on the remittance page identifies the 'starts on' page for each summary section and Service Detail.

**2** The **Custom reports** section is the second-level table of contents that identifies each:

- Usage summary report
- Analysis report
- Service Detail section

|                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                     |

# Remittance Page

- 3** The invoice features **variable logos** that reflect the various brand names of Qwest. **Partner logos** will appear above the customer address if the account is a partner account.

- 4** The **Invoice contents** is the first of two tables of contents in the invoice. This section lists invoice account summaries and on which page the account summaries start.

- 5** The **Payment summary** section contains Current net charges, Previous balance, Payments received, and Adjustments. Total current net charges are divided into three amounts:

- Current gross charges
- Discounts, promotions, and fees
- Taxes and surcharges

**Note:** Payments and other credits to a customer account appear as negative values.

- 6** Marketing messages targeted to Qwest's customers appear in this invoice section. This example invites customers to take advantage of Qwest's credit card billing option.

[illegible]

# Remittance Instructions

**7** Regulatory messages and **Payment instructions** appear on page 2 of the invoice.

| <b>Permissive dialing over for Ohio 614/740 area code split</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                    |                                                               |
| When area code 614 split to 740 on November 8, 1997, customers were given a permissive dialing period to dial either area code to reach their desired parties. On Saturday, June 6, 1998, however, the permissive dialing period for the 614/740 area code split ended. Where applicable, the former area code of 614 is no longer valid and 740 is mandatory. Businesses affected by the new area code should check with their PBX supplier to make sure their equipment can handle the new codes. If your area code is not changing, you may need to reprogram speed dialing features to keep in touch with business associates.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                    |                                                               |

| The Ohio Relay Service enables persons with communication disabilities to use their telephone, often referred to as a "TTY" or "TDD," to place calls to and receive calls from hearing people anywhere. Call 1-800-750-0750 to use the Ohio Relay Service. When using a TTY/TDD, the typed messages are transmitted to a Communication Assistant, who voices them to hearing persons. Hearing persons' messages are voiced to the Communication Assistant who relays them to the TTY/TDD printer or display. Calls can be placed 24 hours a day, seven days a week, with no restrictions on the length or number of calls placed. All calls are confidential. If you are a registered TTY/TDD user, long distance calls with in Ohio are charged at discounted rates to adjust for the additional time needed to make a relay call. If emergency help is required, call 911 or your local emergency number. For questions, comments, problems, or complaints about the Ohio Relay Service, call the Relay Service toll free administrative number at 1-800-325-2223. The Ohio Relay Service is operated statewide by Sprint Communication Company, L.P. |                                    |                                                               |

# Your Account Balance

**Your Account Balance** reconciles invoice charges at the customer account and product account levels..

**8** Master account invoices include all amounts for the primary and each secondary account in the **All Accounts balance** section. Additionally, master account invoices include detail amounts for each customer account.

**9** The following items are subtotaled for the customer account:

- **Previous Balance** shows the customer's balance for previous billing period.
- **Payments Received** shows all payments received within the billing period.
- **Current Gross Charges** contains the account charges for the current billing period.

**10** Detail amounts are identified at the product account level for:

- **Discounts & Promotions** identifies discounts or promotional rates that apply to the account.
- **Taxes and Surcharges** lists all applicable federal, state, and local taxes and surcharges.
- **Payments and Adjustments** contains all account adjustments for the billing period

# Invoice Group – Summary of Charges

**Invoice Group – Summary of charges** is a report that appears only for the master account in an invoice group. **Summary of charges** (*Total Current Charges, Previous Balance, etc.*) for each account in the invoice group – both primary and secondary accounts – are identified.

The primary account is listed first, followed by secondary accounts in ascending order.

# 12-Month Review of Spending

**13** For a master account in an invoice group, amounts are summarized at the **All accounts** level. Each primary and secondary customer account spending pattern is displayed in a separate bar chart.

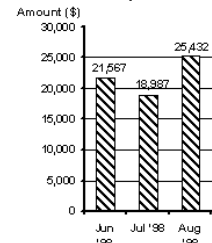

**14** The **12-month review of spending** bar chart displays charges for the past 12 months of service.

## 12-month review of spending 13

All accounts

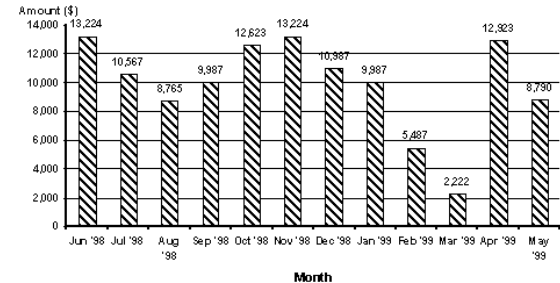

## Manhattan headquarters

## 12-month review of spending (continued) 14

Chicago Office

# Usage Summary Reports

**Usage summary reports** summarizes call detail for each usage product component (domestic and Mexican, for example).

The type of usage summaries to appear in an invoice vary based on the product component(s) that are associated with the customer's product and the customer's actual usage.

For a master account in an invoice group, separate usage summaries are included for each customer account.

# Total Usage

**Total usage** summarizes all call activity by service type for each ANI (Automatic Number Identification).

For a master account in an invoice group, total usage is included for the primary and each secondary customer account.

# High Call Volume

**High call volume** report lists phone numbers called that exceed a customer-defined threshold amount. The customer can set the threshold based on the number of calls, minutes of use, or dollars.

Called phone numbers are identified either by originating number or by the PAC.

For a master account in an invoice group, high call volume is identified for the primary and each secondary customer account.

# Top City Report

The **Top City report** identifies calling patterns by city for each service type. The customer can set the threshold for a number of cities.

For a master account in an invoice group, amounts for the primary and secondary accounts are summarized at the **All accounts** level. Additionally, the primary and each secondary customer account calls/duration/charges are summarized by city.

# Service Detail

The **Service Detail** section of the invoice shows usage charges and non-usage charges by service type. The section is organized by:

1. Service type
2. Customer account (master account invoice only)
3. Product account (Corporate or Sales, for example)
4. Component (ANI, card, and Toll free)

Sections in Service Detail with usage-based charges are as follows:

- **Outbound switched usage**
- **Inbound switched usage**
- **Outbound dedicated usage**
- **Inbound dedicated usage**
- **Calling card**
- **Ring-to service** (switched and dedicated)

For each service type that identifies usage-based charges, the following rules apply:

- Calls without a PAC are listed first by originating ANI.
- Calls with a PAC are identified last and are grouped by the PAC name or number.
- International calls (including Mexico and Canada) are included with domestic calls.

**Note:** There is no capability to provide separate listings for international, domestic, Canada, and Mexico in the **Call detail** section.

An example of each section follows.
