

SHAREPOINT ONLINE

Microsoft **SharePoint Online** enables an organization to easily create and manage custom team-focused and project-focused sites for collaboration. In addition, it's possible to deploy an organization-wide intranet portal used to disseminate information and news across the organization.

SHAREPOINT INCLUDES

- **SharePoint 2013 Enterprise Edition**
 - » Web-based collaboration environment
 - » Document Management including version control
 - » Centralized backup
 - » SharePoint Enterprise features such as business data center, Excel services, and search capabilities.
- Authorization to content handled via **roles-based group security**
- **SharePoint aware Anti-Virus software** capable of detecting viruses on content added to the SharePoint environment.
- **Distributed administration** of sites
- Enhanced **Service Tier support** (i.e. 24x7)
- Site and item level **backup and restore**
- And much more! See the Service Offering Description for more details.

FEATURES

Anywhere Access - You need to stay productive wherever life takes you, and you can with the SharePoint app! Available for free download on Apple and Android.

Seamless Collaboration - Today's SharePoint team site is your team's content hub. Everyone you work with can come together in real time - all while using the same, familiar Microsoft Office tools you use everyday.

Enterprise-grade security and compliance - Today, more than ever, enterprises need a scalable solution that meets security and compliance requirements. SharePoint offers best-in-class security, with more than a decade of experience building enterprise software and online services.
