

WISCONSIN STRATEGIC IT PLAN

2024 - 2026

Acknowledgements

This plan would not be possible without the time and energy of numerous agency and DOA Division of Enterprise Technology (DET) staff and leaders in writing, editing, and preparing this report. The Strategic IT Plan reflects the input and feedback of leaders throughout the State of Wisconsin, including agency deputy secretaries, administrative officers, and chief information officers.

The 2024 – 2026 Statewide Strategic IT Plan was submitted on September 15, 2024, to Governor Tony Evers and the Wisconsin Legislature’s Joint Committee on Information Policy and Technology. We want to thank the Statewide Strategic IT Plan team members listed below for their time in developing and refining this plan.
