

Meet-Me Conference Service (MMCONF)

A station user may set up a conference call for a special time of day to use the Meet-Me Conference feature. The assigned Meet-Me Conference directory number (DN) for the conference is dialed at the designated time. Each conferee (up to 30 with Super Conference) is automatically added to the conference when the Meet-Me conference number is dialed. As conferees are added, all conferees, excluding the new arrival, will receive a tone to indicate that a party has been added.

The maximum number of Meet-Me conference numbers per customer group is 16. When all conferees are connected to the Meet-Me conference number, a switchhook flash by any conferee will lock the circuit thereby preventing anyone else from entering the conference call. An additional switchhook flash will create an attendant recall.

Feature Activation...

Action: Dial the Meet-Me conference dialed number (DN)

Response: Ringback tone is heard until a second conferee is added

The actual number of attendees on any one conference call or simultaneous conference calls is determined by the available bridging equipment in a particular Central Office.

FAQ's

What is the cost per minute when calling the line? – it is the person calling into the conference that may have a cost. The conference numbers are local numbers in Madison
