

Cellcom Waiver - Wireless

In the event that none of the contracted vendors are able to meet technical requirements, Agencies (including UW Campuses) must seek a waiver to use a non-contracted vendor based on business needs.

Enterprise waivers may be withdrawn if/when conditions change.

Agencies must keep a record of services purchased under this waiver and make such information available upon request.

The following enterprise waiver is currently in place for use of CellCom as follows:

- Agencies may purchase wireless services from CellCom for staff working in the Wisconsin geographical pocket where none of the contracted wireless service vendors provides coverage to meet business needs.
- This waiver is based on coverage needs only, not cost or any other factor, and the agency must first conduct due diligence testing the capabilities of the contract vendors before initiating a service agreement with CellCom.
- Agencies that have a need to purchase CellCom under the terms of this enterprise waiver are responsible for meeting all procurement rules based on the dollar amount the agency plans to spend. This enterprise waiver only waives the requirement to use the Contract 505ENT-M17-WIRELESSPH-xx for wireless service to impacted staff; it does not in any way waive procurement rules which each agency is responsible for following in order to make purchases with CellCom.
