

## FirstNet AT&T Employee Discount Information

For **FirstNet** each account that sets up receives a unique affiliation code that ties to an approving administrator to approve. Each agency must verify that the user is 1) actively employed 2) Serves as an individual who is a first responder or someone who supports them during an emergency. Not just anyone can get FirstNet and the final decision falls to the agency to who would qualify. This process is meant to be streamlined and easy for all parties involved. We strongly encourage the users to work with Tim and I so that the end user's connectivity can be managed during an emergency or planned event by the agency (No personal info is shared with the agency, only the Telephone number and username for EM response coordination). Too often we see end users go to a retail store and not get the correct affiliation, and we must correct affiliation after the fact or during an emergency.

For general information on promotions and discounts for FirstNet you can visit [Latest Cell Phone Plan Discount for the Families of First Responders](#)

We are happy to schedule a brief call to discuss this in greater detail. I want to be sure to provide you with all information you are requesting.
